

20 December 2021

## The airline HISKY begins operations at Milan Bergamo Airport

Monday 20 December 2021 saw the commencement of operations by the airline HiSky at Milan Bergamo Airport with the flight from Tirgu Mures, using one of the five A320s belonging to its fleet, which then took off for Baia Mare.

Both destinations, in Romania, are served on a twice-weekly basis (Mondays and Fridays) with return flights on the same day.

Monday 24 December, HiSky will be inaugurating flights to Chisinau, Moldavia; again with twice-weekly return flights every Monday and Friday.

The aircrafts from the HiSky fleet have a full-economy layout with Premium and Premium Plus classes, which allow travellers access to numerous advantages.

HiSky is a certified air transportation company in the Republic of Moldavia and in Romania, and began operating in March 2021, transporting a total of approximately 150 thousand passengers in its first nine months of activity.

*“We are welcoming a new airline, which began operations in the post-pandemic period, demonstrating its efficiency and reliability, factors that are important for an increasingly high number of passengers”, stated Giacomo Cattaneo, Director of Commercial Aviation for SACBO. “We are certain that the routes served by Milan Bergamo Airport, part of its ever wider-ranging network of connections, will contribute to increasing the number of passengers transported by HiSky”.*
