## **SACBO GROUP CONFIRMS ITS 3rd LEVEL AIRPORT CARBON ACCREDITATION**

After a timely verification of the requirements, ACI Europe has confirmed again for 2022 the SACBO Group's third-level certification (so-called "Optimization") of the Airport Carbon Accreditation.

In addition to certifying the continuous reduction of the carbon footprint produced by aeronautical activities and services carried out in the airport, this third-level certification is a testimony of considerable importance in terms of the commitment and actions developed to achieve the reduction objective for CO2 emissions. Also involved in the emission reduction plan are third parties and the stakeholders of the SACBO Group, through actions and initiatives which aimed at their participation and at raising awareness and sharing the objective underlying the plan.

The increase to the third level of the Airport Carbon Accreditation was obtained in 2020, when the SACBO Group continued its commitment to environmental sustainability while operating during the health emergency caused by the Covid-19 pandemic.
