SACBO PRESENTS ITS SUSTAINABILITY ROADMAP
AT THE 24TH EDITION OF INTER AIRPORT EUROPE IN MUNICH

SACBO took part in the 24th edition of Inter Airport Europe, the international Exhibition for Airport Equipment, Technology, Design and Services taking place in Munich, during a session dedicated to the sustainability of air transportation.

SACBO's contribution, which saw the involvement of the company To70 Italia, concerned airport sustainability roadmaps, and presented the case study for Milan Bergamo Airport.

In particular, the presentation examined the criteria used to define the goals for reduction of CO2 emissions, the implementation of green initiatives (production of photovoltaic energy, conversion of service vehicles to electric power), and the involvement of the airport system, from aircraft fleets to multi-modal land-based public transportation, including rail and bicycle accessibility.

"It is essential to monitor one's progress on the sustainability roadmap in order to carry out appropriate improvements" - a point highlighted during the intervention held by Paolo De Forza, Head of Environmental Affairs Unit at SACBO, together with Denise Farese from To70 Italia - *"By adopting actions aimed at sustainability, defined within each roadmap, airports will be able to reduce their emissions, conserve resources and contribute to a more environmentally compatible future"*.

The logo for Milan Bergamo Airport (BGY) is located at the bottom right. It consists of a dark blue square containing the text "MILAN BERGAMO AIRPORT" in white, stacked vertically on the left, and the letters "BGY" in a large, bold, white font on the right. Below the logo, the website address "www.milanbergamoairport.it" is written in a smaller white font.
